

# Amarac Technology Solutions.

## Agile. Flexible. Innovative. Responsive.

*“Management of any organization or process, public or private, without readily accessible good and reliable data is akin to driving a vehicle at night, without headlamp, streetlight or even moonlight; an extremely difficult proposition, it is. Under such condition, it will take a very long time to get to ones intended destination, if at all one gets there.”*

— CEO, Amaran Technologies Incorporated

## NUDAP™

### Improve Productivity, Efficiency, and Revenue

NUDAP™ empowers organizations, public or private to take real ownership of their data and truly leverage it to drive operational efficiency, productivity, and economic growth.

From easy access to data, data security, and data analytics, NUDAP gives public and private organizations the opportunity to leverage data in various key ways that create new economic opportunities and drive economic growth. It has been said that data is the new crude oil, NUDAP provides you the platform to mine and process it efficiently and cost effectively. Let NUDAP help you unlock your untapped hidden treasures.

# Flexible Solutions to Fit High Productivity Needs

NUDAP™ delivers an economic engine for a 21<sup>st</sup> century economy — a data driven economy that leverages data science and AI technologies to create multitudes of information products, services, and improve efficiency and productivity.

## Digital Transformation

Amarac will transform your paper-based data into digital electronic data, easily accessible, searchable, and usable in analytics.

**FileLogic** — Using its proprietary technology, Amaranac will convert paper documents into electronic documents, while extracting and storing metadata in secure searchable databases.

**Rapid Implementation** — Rapid Implementation means that you will be up and running in a consistent manner (rolling schedule of onboarding data, year after year in reverse). Amaranac's proven implementation process ensures a smooth and dependable rollout schedule.

**Turnkey** — We deliver a complete system for end-to-end business process; responsive user friendly and device agnostic interface, secure databases, data marts, and data warehouse.

## Data Monetization

### New Revenue Streams —

Turn data into products, consumable by the individual end-user consumers and organizations (clearing houses, brokers, consulting services, etc.)

### Fully Integrated System

Integrated ETL, Storage, and Access Management Solution

**Real-time Analysis** — Real-time and accurate feedback on patient assessments

**Compliance** — HIPAA, GDPR, NYDFS, CCPA, etc.

**Fully Secure Access** — Secure 24/7 access to data from anywhere, to staff, partners, and the public

**Document Management** — Fully Integrated Document Management System

**Business Intelligence Capabilities** — AI based descriptive, predictive, and prescriptive analytics for decision support systems

**Reliable Data Entry** — Rapid and accurate Data Entry, augmented with Robotic Process Automation (RPA)

**\*No Upfront Cost** — Amaranac will fully fund the project on an MSA that guarantees investment recovery and profit sharing.

*“More than anything, the one set of factors that has made the emerging integrated global economy possible is data, information and easy accessibility to both. Countries that have embraced the technology to bring them about have prospered by becoming smartly integrated with the global economy in ways that accelerated their economic growth and overall development.”*
